Funny, I don't remember seeing 14 separate \$2000/month checks coming in. Maybe if they all had separate connections, we wouldn't be having the problems with the connection at MCI with Dante, ANS and Suranet, WOULD WE!!! The good news is that Sprint and UUNET are DEFINITES on the FDDI!!!

AlterNet has been paying for the NSFNET connection (ENSS136) to MAE-East since this connection first came up.

With the NSFNET going away on Nov 1st, we will cease paying for this connection. If the NSFNET date is extended beyond Nov 1st, we would like to set up a cost sharing arrangement.

AlterNet and Sprint are going to upgrade their connections to MAE-East to a direct FDDI connection.

What plans do other folks have?

Current MAE-East participants:

- ANS
- AlterNet
- Dante
- ESnet
- European Route Server
- ICMnet
- MCI
- Merit Route Server
- NETCOM
- NSFNET
- PIPEX
- PSInet
- SURAnet
- Sprintlink

New (not up yet) MAE-East participants:

- Clarknet
- Databank
- Interpath
- Net99
